

Enhancing Building Performance through Operational Intelligence

Total Energy Cost Savings
£247,850 / year
Based on current optimisation measures

2025 CRE Data Solutions of the Year
PropTech Breakthrough Awards

A Single Platform for your Building Portfolio that **Connects, Analyzes, and Optimizes** Building Performance.

KEY BENEFITS:

- ✓ Real-time Monitoring
- ✓ Comparative Analysis
- ✓ Compliance Reporting

Real-time Monitoring of BMI System

Why Organisations Struggle to Enhance Building Performance

Property and asset teams struggle to optimise portfolios and report progress to stakeholders due to fragmented data and manual processes.

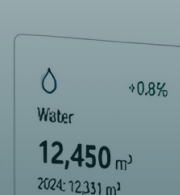

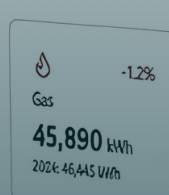

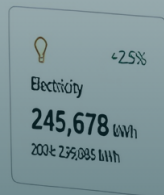

- ✗ Manual Reporting Burden
- ✗ Fragmented Data Processing
- ✗ Limited Portfolio Visibility

Intelligent Tools to Deliver Enhanced Building Performance

Portfolio One combines live operational data, intelligent automation, and portfolio-wide analytics to help teams optimise building performance across every asset.

Live Data Integration

Connect smart meters, BMS systems, and building technologies into one platform.

Utility Manager

Track electricity, gas, water, waste, and cost performance with advanced analytics.

BMS Manager

Monitor live building systems, identify anomalies, and automate alerts.

Portfolio Performance Register

Benchmark and rank buildings to identify under performing assets.

Automated Reporting

Generate building and portfolio reports instantly using live data.

Net Zero Tracking

Monitor emissions and track progress against reduction targets.

Provides the Ability to Assess the Operational Performance:

HVAC Performance

Occupancy Trends

Utility Consumption

Lighting Systems

Fire Alarm System

Temperature and Humidity

Indoor Environmental Performance

Security System

"Portfolio ONE has transformed how we monitor and manage energy across our entire property portfolio. The real-time insights have helped us reduce costs by over 30%."

— Head of Facilities, UK Healthcare Property Group

The Sectors We Serve
